

# ATMOS S-Class Workstations

The new benchmark in ENT Technology

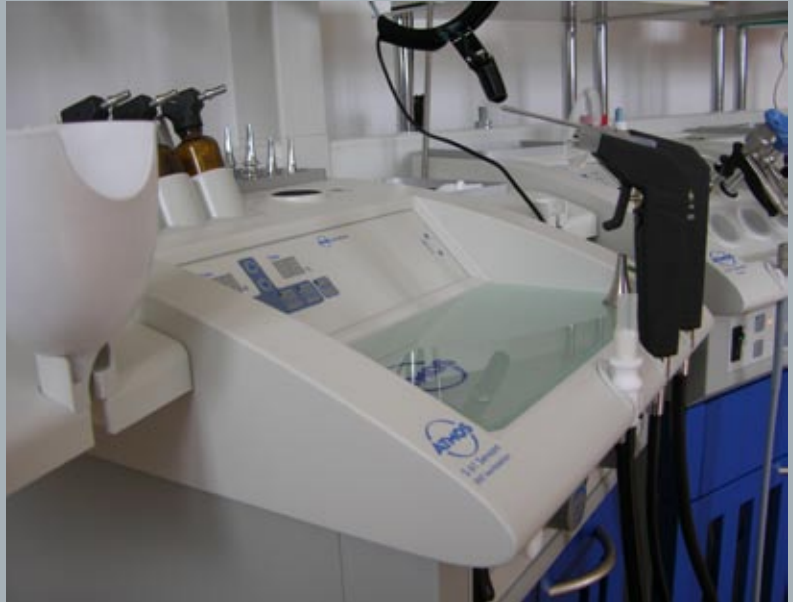

## Small Details Make a Huge Difference

### Designed to Make Your Daily Work Easier

#### Sensor Technology:

- The miniaturized light barriers control pressure and suction system, light channels, and headlight
- The light is switched on and the camera is automatically adapted to the correct endoscope settings when an endoscope is taken out from the holder.
- The illumination for the microscope switches on automatically
- The camera's automatic white balancing and easy focus features provide clear visualization on most laptop and stand alone monitors

ATMOS S 61: State-of-the art technology is standard

## The ATMOS S-Class

### Takes Everyday Workflow in New Directions

Your everyday work life will get easier with our S-Class ENT workstation. The ATMOS S 61 provides time saving workflow with a variety of features that ensure you and your patient maximum, stress-free comfort.

# ATMOS S-Class

## A Century of Craftsmanship

ATMOS offers you the latest in workstation innovation with over 100 years of German manufacturing expertise.

The ATMOS S 61 includes ergonomically designed modules that can be tailored to your individual workspace needs. The workstations provide practical and convenient solutions for ENT diagnostic and treatment applications. At the same time it improves efficiency, instills confidence, reassurance, and increases profitability.

# ATMOS S61 Standard

## German Luxury at an Affordable Price

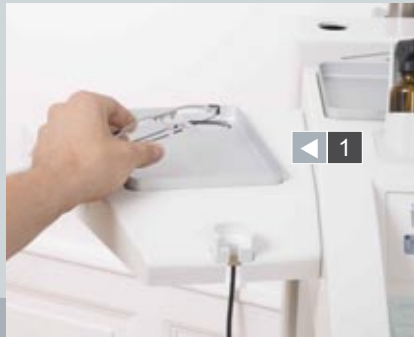

The S61 Standard takes luxury into new directions at a price that is affordable to almost anyone. The Standard module contains the most important basic workstation functions. The ATMOS S 61 Standard is perfect for a small budget or a start up practice and can be upgraded when it is necessary.

The ATMOS S 61 Standard is designed for the most demanding clinic and practice use.

- Solid steel housing provides the necessary sturdiness and durability
- High-quality materials and lacquers withstand the most destructive caustic disinfectant solutions
- Heavy-duty castors provide the mobility needed for easy cleaning of the examination or treatment room
- Well-hidden technology for a clean look and easy maintenance

**1** Tray for patient's personal items
